**THE ROLE OF NAVIGATION
IN SUPPORT OF HUMAN ACTIVITY**

**XVII International Scientific and Technical
Conference**

First Announcement
September 23 – 25, 2010

NAVSUP 2010

Gdynia, POLAND

The Institute of Navigation and Hydrography of the Polish Naval Academy is honoured to invite you to the XVII International Scientific-Technical Conference on "The Role of Navigation in Support of Human Activity" which takes place in Gdynia on **SEPTEMBER 2010**. The place of the opening ceremony and the first day of the conference is Polish Naval Academy. The second part of the conference takes place at sea on the board of a ferry.

The Navigation Section of the Geodesy Committee of the Polish Academy of Science, the Hydrographic Office of the Polish Navy and the Maritime Office in Gdynia are co-organizers of the conference.

We are going to proceed in plenary sessions and the following thematic sessions:

- navigation;
- geodetic and hydrographical support of human activity at sea;
- radionavigation and satellite systems;
- hydrometeorological support of maritime shipping;
- safety and security of maritime shipping;
- manoeuvrability and hydrodynamics of ships;
- maritime education and training.

A poster session will be introduced in case of a large number of submitted papers. Qualified authors will be informed in advance. Papers accepted by the Scientific Committee will be reviewed by the team of the international experts pointed out by the Scientific Committee and then published in the conference proceedings and / or Annual of Navigation. There are two conference languages: Polish and English, however English is preferable.

The main objective of our conference is to promote and exchange the scientific knowledge and experience. Traditionally, it is also an opportunity for meeting of scientific and engineering communities and all others who deal with navigation and various areas of human activities at sea.

Additionally, we are planning an independent commercial session where the representatives from different companies will be able to present their

products for a large group of navigators and the whole maritime society. All firms interested in participating in the commercial session are asked to contact organizers for details.

Detailed information about the conference you can find on our Internet web page:
